

---

## Soft Skills

### Creativity

- Ability to design visually appealing and user-friendly interfaces.
- Think outside the box to solve design challenges and enhance user experience.

### Attention to Detail

- Ensuring your assignments, projects, or personal websites are pixel-perfect and have a strong focus on UI consistency.
- Reviewing and refining your work to ensure that every aspect aligns with your vision or assignment requirements.

### Collaboration & Teamwork

- Working on group projects (either in school or as part of extracurricular activities) where you contribute to frontend development or design tasks.
- Actively participating in team discussions, learning from others, and contributing feedback.

### Problem-Solving

- Troubleshooting bugs and issues in your frontend development projects or coursework.
- Applying logic to resolve design or coding challenges and improving functionality (e.g., debugging in JavaScript, fixing CSS issues).
